## TREE TIES

Drive nail through the tie at the back of the stake to secure tie.

Place around stake and tree, then secure in place. For best results, tie to stake in at least two locations.

### VILLA RUBBER TREE TIE

Simple, Durable. Versatile. Inexpensive. Created to meet the demands of the environment, the tree tie represents unparalleled design in ease and versatility.

Fabricated from flexible vinyl, The tree tie is formed into a single, self-locking component. The result is an adaptable and resilient tree that allows quick installation and removal. In addition, it can be reused, which makes it extremely economical.

Simply the Best. Available in 24", 32" and 36" lengths.

### HOZEWIRE

The combination of vinyl tubing and galvanized wire create a simplistic yet effective design for Hozewire tree ties. Hozewires are available in both 27" and 36" lengths.

## VILLA TREE GUARD

The Villa tree guard is used to prevent damage from mowers, weed trimmers and rodents, and is made from a durable high density and lightweight polyethylene material with ultraviolet inhibitors.

The tree guard has perforated vents for proper ventilation to the tree trunk plus the tree guard is designed to expand with the tree trunk as it grows. Larger trees can be protected by joining multiple guards together.
