## WOODFLEX PLUS®

WOODFLEX PLUS bender board is a remarkable alternative to today's lawn edging products. WOODFLEX PLUS is quickly becoming the preferred product for landscape applications in both the home and commercial landscaping industries.

WOODFLEX PLUS bender board is superior to other lawn edging products because of its durability and multiple uses. It looks like redwood, but performs like plastic. WOODFLEX PLUS bender board can be bent and curved to fit all your landscaping needs.

### APPLICATIONS:

Lawn Edging	Terrace Board
Concrete Forming	Vegetation Control
Miniature Golf Courses	Home & Commercial

### FEATURES:

- . Durable plastic material stands the test of time
- . Pliability makes it ideal for a variety of projects
- . Strength withstands weather and the human element
- . Made with recycled plastic
- . Made in the USA

### BENEFITS:

- . Look of redwood is an attractive feature for any project
- . Lasts longer than other lawn edging products
- . Waterproof
- . Won't rot, split or crack
- . Thicker and stronger than other lawn edging products
- . Resists damage caused by weed-whackers and lawn mowers
- . Environmentally friendly
- . Simplifies lawn maintenance
- . Can be used multiple times for forming concrete walkways and patios

### WOODFLEX PLUS SPECIFICATIONS

#### SCOPE

This specification describes 1" x 4" x 20' WOODFLEX PLUS for use in landscape applications.

#### PERFORMANCE

Pliable plastic material bends and conforms to a variety of shapes. Durability withstands multiple uses; very useful when forming concrete walkways and patios. Lasts longer than similar products made of wood. WOODFLEX PLUS is the most durable in lawn edging.

#### JOINTS

Tapered ends fit snugly together for a clean fit. Ends are strong and resist chipping and breakage.

#### MATERIAL PROPERTIES

Made from recycled materials for strength and environmental awareness.

Sheds water and withstands damage caused by weed-whacker and lawn mowers. Material resembles beautiful redwood, but maintains the durability of plastic.

#### INSTALLATION

Installation is similar to installing other edging products, requiring tools such as edgers, shovel, spade, trowel, mallet, string, rake, etc.
